

Solar Engineering Proposal

Prepared for: Khan

Location: Khanpur

Proposal #	BARQON-2026-0024	System Size	8.0 kW
Date Issued	03 May 2026	Valid Until	18 May 2026

Item Description	Technical Specs	Qty	Amount (PKR)
Solar Panels (Longi Hi-MO 6 (Tier-1))	585W	14	935,998
Inverter (Inverex / Nitrox Premium)	8.00 kW Hybrid	1	520,000
Battery Bank (Pylontech / Narada)	4.00 kWh Lithium (0.00h backup)	1	312,000
Mounting Structure (Standard)	Galvanized Iron	1	166,400
DC Cable (4mm/6mm)	Rate: PKR 0.00/meter (Final length confirmed on site)	As req.	Site Dependent
AC Cable (10mm/16mm)	Rate: PKR 0.00/meter (Final length confirmed on site)	As req.	Site Dependent
Installation and Commissioning	Turnkey service	1	104,000
Transport and Logistics	Delivery to site	1	5,000

Subtotal (Engineering & Equipment) PKR 2,043,398

Adjustment / Discount PKR -0

Tax Amount PKR 0

NET PAYABLE AMOUNT PKR 2,043,398

Terms & Conditions of Service

1. **Validity:** This quotation is valid only until the mentioned validity date. Prices may change due to market fluctuations.
2. **Availability:** Equipment brands (Longi, JA Solar, Inverex, Growatt, etc.) are subject to availability at the time of order confirmation.
3. **Site Survey:** Final system design and material quantities may vary slightly after a physical site inspection.
4. **Structural Safety:** Customer must ensure roof accessibility and structural safety for panel mounting.
5. **Net Metering:** Net metering approval is subject to local DISCO policies, regulations, and processing timelines.
6. **Payment Schedule:**
 - 60% Advance Payment upon order confirmation.
 - 30% Payment before dispatch of main equipment.
 - 10% Final Payment after commissioning of the system.
7. **Delivery:** Standard delivery time is 7–15 working days after payment confirmation.
8. **Warranties:** All product warranties (Panels, Inverters, Batteries) are provided directly by the manufacturers.
9. **Force Majeure:** BARQON is not responsible for delays caused by government approvals, weather, or global supply chain issues.
10. **Civil Work:** Any major additional civil or structural work requested will be charged separately.
11. **Installation:** Prices include standard installation only. Custom cabling or long-distance runs may incur extra costs.

System Technical Specifications

Component	Brand / Detail	Engineering Note
Solar PV Modules	Longi Hi-MO 6 (Tier-1) 585W	High Efficiency Monocrystalline
Solar Inverter	Inverex / Nitrox Premium 8.00kW	Hybrid pure sine wave
Battery Storage	Pylontech / Narada 4.00kWh	Lithium deep cycle
Mounting Type	L2	Galvanized Iron
DC Protection	0 x SPD, Breakers	Lightning and Surge protection included
AC Protection	MCB/MCCB	Safe disconnect and grid isolation
Cable Specs	DC: 6mm, AC: 10mm	99.9% pure copper premium cables

Installation Standard: BARQON ensures all installations follow NEC (National Electrical Code) standards. All wiring is concealed in high-quality PVC conduits and ducts for longevity and safety.

Agreement & Project Authorization

This document serves as a preliminary project agreement between BARQON Solar Solutions and the undersigned customer for the design and installation of the solar PV system described in this proposal.

Customer Declaration:

I hereby confirm that the information provided regarding the energy load and site conditions is accurate. I have read and accepted the Terms and Conditions mentioned in this document and authorize BARQON to proceed with the preliminary project phases upon receipt of the advance payment.
